Shrubs: All the roses listed here are ideal for a number of purposes in the garden, whether grown on their own, or in association with other flowers and shrubs. We have indicated varieties that also perform very well in large containers and those which are ideal for hedging.

Climbers: Varieties marked * may also be grown as short climbers. All David Austin's Climbing Roses are suitable for South, East and West-facing walls (S,E,W). Some of the more vigorous varieties are also suitable for North-facing walls (N).

Sun/Partial Shade: All are recommended for full sun or partial shade, provided there is not too much competition at the roots and the rose is not overhung by trees.
