For many experienced and aspiring gardeners, the ideal perennial garden is a flowering English border, photographed at the height of its bloom. With that as its inspiration, Russell's Long-blooming Garden for Sun features outstanding perennial varieties that will bloom and bloom in your garden. White, blue and purple are dominant colors but we list alternative choices so you can customize your color palette. Choose all white or add some soft pink. If you like a splash of orange in a garden, choose Belamcanda, Kniphofia, and Achillea 'Terracotta.' Whatever you select, these long-blooming varieties will give you a season full of color.
